1. Gold collectibles trading claims supporting documents received within the **28th October, 2019 and 28th November, 2019** period for rigorous audit purposes is about eighty percent (80%) complete. We note that, a great number of about forty five percent (45%) of claimants/transactions supporting documents are either incomplete, fraudulent, inconsistent comparative to dates, figures and amounts received as returns on the gold collectibles trades with the agreed sum stipulated in the signed and sealed **“Gold Sale and Purchase Agreements”**, most unbelievably, trading Agreement dates that reflects periods when our Company was not in operations and so on.
2. Additionally, we have discovered shocking evidence that points to the fact that, some claimants purporting to be indebted to by Menzgold transacted through third parties; some unethical Menzgold and Brew Marketing Consult staff members and in other instances via referrals, mostly close relations who took delivery of their funds under the pretext of signing them unto to the Menzgold **“Gold Vault Market”** but ended up engaging in the many cryptocurrency products on sale on the Ghanaian market, with a monthly return on investment (ROI) ranging between thirty and sixty percent (30%-60%).
3. We are commencing the final phase of the audit; this session would be traders/claimants interviews to fully ascertain facts and satisfy ourselves with regards to questionable adverse discrepancies and irregularities that characterize some transactions claims received for audit and its subsequent payment. Hence, invitations would be extended to some individuals
